

*....a combination of enforced, uninterrupted, and prolonged rest;
the first gives relief from pain;
the second, added to the first, enables the case steadily to progress to a cure;
the third secures that which has been gained.*

Hugh Owen Thomas 1876.

*Mouvement dosé.
Prudent motion, methodical motion'*

Lucas Championniere 1879.

Acknowledgements

The following companies supported this programme of research with the loan of equipment, provision of technical assistance or financial support in the form of research scholarships:

Glaxo Research Laboratories.
