

Preface

This is the second compilation of Proceedings and Dissertation Abstracts published as a separate Supplement to *Acta Orthopaedica Scandinavica*. The 196 abstracts from meetings and 24 dissertation abstracts represent, hopefully, the current state of the art of orthopedics in Scandinavia and in the Netherlands. Revision is carried out by the National Proceedings Editors, as well as by the editorial staff of *Acta Orthopaedica Scandinavica*. Prerequisites for publication are that the contents of the abstract are of good quality, that the abstract has not previously been published, and that the abstract presents the results of the study. Abstracts ending "the results will be presented and discussed" are generally excluded. Finally, instructions for abstract authors are published in this supplement on page v.
