

# Erratum

Figure 2 in the article by Strömqvist et al. in Acta Orthop Scand 1987;58(5):494-498, was reproduced incorrectly due to a technical error. The figure has been redrawn and is presented below.

Femoral head ratio

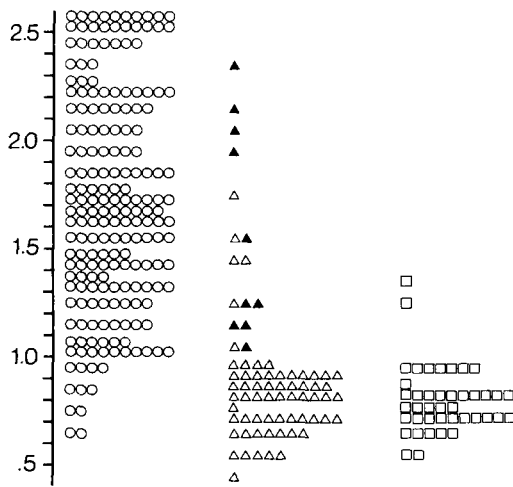

Figure 2. Prognostic precision in postoperative <sup>99m</sup>-TC MDP-scintimetry in 306 femoral neck fractures. Femoral head ratio for cases with uncomplicated healing ○, redisplacement/non-union △ and segmental femoral head collapse □. Solid symbols indicate cases with healing complications due to technical failure.
